Capgemini | Microsoft

Four ways Azure VMware Solution *saves you money*

Moving your VMware workloads to Azure is a great solution for business agility and flexibility. And with Azure VMware Solution (AVS) it also makes financial sense. Let Capgemini help you get started.

01 AVS includes VMWare Cloud Foundation (VCF)

AVS is a fully managed service that includes VCF technology. If you have already renewed with VMware, AVS now supports portability of your VCF licenses.

02 You can lock in price for up to five years

Using Reserved Instances (RI) for AVS enables you to lock in pricing and discounts for one, three, or five years. For a limited time, you can get an additional 20% off the one-year RI.* When you modernize to IaaS, your RI pricing stays the same.

Special offer: One year and five-year RI for AVS ends on June 30, 2025

03 You can get unmatched cost savings as a Microsoft customer

Azure Hybrid Benefit gives you the ability to use Windows Server to significantly reduce costs. Plus, you can get free Extended Security updates for Windows Server and SQL Server 2008, 2008 R2, and 2012.

Save up to

80%

when you combine Azure Hybrid Benefit with Azure Reservations.

04 Azure VMware Solution can help optimize your IT costs

16%
average savings of direct infrastructure-related costs with Azure.[1]

37%
average three-year cost savings when you run equivalent workloads on Azure.[1]

54%
potential total cost of ownership savings on Azure versus running on-premises.[2]

Schedule an assessment today with Capgemini.
Let our team show you how to enjoy unmatched cost savings **with Azure.**
